Education and qualifications

2006	B.Sc.(Hons)	Industrial Engineering	North Dakota State University
2008	M.S.	Industrial Engineering	University of Arkansas
2012	Ph.D.	Industrial Engineering	University of Arkansas

Employment history

2018–	Assistant Professor , Department of Industrial & Systems Engineering, University of Tennessee
2012–2018	Assistant Professor , Department of Industrial & Systems Engineering, Mississippi State University

Awards and honors

2018	Article selected as Best Application Paper in the IISE Transactions Focus Issue
2016	Article featured in Research Highlights section of IISE Magazine

Grants

External research grants over \$30,000 are listed below.

2020–2021	Medal, H.R.. "STIR: Scalable Computation of Sublevel Sets of Nonconvex Functions Using Approximate Convex Envelopes". <i>Funding from Army Research Office</i>	\$47,418
2020–2022	Truster, T., Medal, H.R.. "Data Science Supplement for CAREER: Predictive Fatigue Behavior of Structural Materials Through Computationally-Informed Textural and Microstructural Influences". <i>Funding from National Science Foundation</i>	\$68,958
2022–2025	Medal, H.R. and Sherwin, M.. "Artificial Intelligence Models for Predicting Supply Chain Failures and Their Impact". <i>Funding from Naval Underwater Warfare Center (Keyport) via the NEEC program</i>	\$330,000
2023–2023	Medal, H.R.. "Supply Chain Obsolescence Strategy Development". <i>Funding from Consolidated Nuclear Security (Medal appointed as PI after death of R. Sawhney)</i>	\$120,000
2023–2024	Medal, H.R.. "Supply Chain Obsolescence Strategy Development". <i>Funding from Consolidated Nuclear Security</i>	\$273,000
2023–2025	Li, X. and H.R. Medal and Heaslip, K. and Xu, H. and Omitamouo, O. and Liu, Z.. "A Cognitive Freight Transportation Digital Twin for Resilience and Emission Control through Optimizing Intermodal Logistics (RECOIL)". <i>Funding from ARPA-E</i>	\$2,500,000

Refereed research papers

1. Medal, H., Sharp, S., Pohl, E, Mason, SJ, & Rainwater, C. (2011). Models for reducing the risk of critical networked infrastructures. *International Journal of Risk Assessment and Management*, 15(2/3), 99–127.
2. Hernandez, I., Ramirez-Marquez, JE, Rainwater, C, Pohl, E, & Medal, H. (2014). Robust facility location: Hedging against failures. *Reliability Engineering and System Safety*, 123, 73–80.
3. Medal, H., Pohl, EA, & Rossetti, MD. (2014). A multi-objective integrated facility Location-Hardening model: Analyzing the pre- and Post-Disruption tradeoff. *European Journal of Operational Research*, 237, 257–270.
4. Medal, H., Rainwater, C, Pohl, E, & Rossetti, M. (2014). A bi-objective analysis of the R-All-neighbor P-Center problem. *Computers and Industrial Engineering*, 72, 114–128.
5. Gedik, R., Medal, H., Rainwater, C, Pohl, E, & Mason, S. (2014). Vulnerability assessment and re-routing of freight trains under disruptions: A coal supply chain network application. *Transportation Research Part E*, 71, 45–57.
6. Medal, H. (2016). The wireless network jamming problem subject to protocol interference. *Networks*, 67(2), 111–125.
7. Medal, H., Pohl, E, & Rossetti, M. (2016). Allocating protection resources to facilities when the effect of protection is uncertain. *IIE Transactions*, 48(3), 220–234.
8. Nandi, A. K., & Medal, H. (2016). Models for removing links in a network to minimize the spread of infections. *Computers and Operations Research*, 69, 10–24.

9. Nandi, A. K., Medal, H., & Vadlamani, S. (2016). Interdicting attack graphs to protect organizations from cyber attacks: A bi-level defender–attacker model. *Computers and Operations Research*, 75, 118–131.
10. Rashidi, E., Parsafard, M., Medal, H., & Li, X. (2016). Optimal traffic calming: A mixed-integer bi-level programming model for locating sidewalks and crosswalks in a multimodal transportation network to maximize pedestrians' safety and network usability. *Transportation Research Part E*, 91, 33–50.
11. Sherwin, M., Medal, H., & Lapp, S. (2016). Proactive Cost-Effective identification and mitigation of supply delay risks in a low volume high value supply chain using Fault-Tree analysis. *International Journal of Production Economics*, 175, 153–163.
12. Vadlamani, S., Eksioglu, B., Medal, H., & Nandi, A. K. (2016). Jamming attacks on wireless networks: A comprehensive taxonomical survey. *International Journal of Production Economics*, 172, 76–94.
13. Chowdhury, S., Khanzadeh, M., Akula, R., Zhang, F., Zhang, S., Medal, H., Marufuzzaman, M., & Bian, L. (2017). Botnet detection using graph-based feature clustering. *Journal of Big Data*, 4(14).
14. Hoskins, A., Medal, H., & Rashidi, E. (2017). Satellite constellation design for forest fire monitoring via a stochastic programming approach. *Naval Research Logistics*, 64(8), 642–661.
15. Rashidi, E., Medal, H., Gordon, J., Grala, R., & Varner, M. (2017). A maximal covering location-based model for analyzing the vulnerability of landscapes to wildfires: Assessing the worst-case scenario. *European Journal of Operational Research*, 258(3), 1095–1105.
16. Schweitzer, D., Jafari, R., & Medal, H. (2017). Analyzing the vulnerability of an array of wireless access points. *Computers and Industrial Engineering*, 107, 25–38.
17. Rashidi, E., Hoskins, A., & Medal, H. (2018). Mitigating a pyro-terror attack using fuel management. *IIEE Transactions*, 50(6), 499–511.
18. Rashidi, E., Medal, H., & Hoskins, A. (2018). An attacker-defender model for analyzing the vulnerability of initial attack in wildfire suppression. *Naval Research Logistics*, 65(2), 120–134.
19. Vadlamani, S., Medal, H., Eksioglu, B., & Nandi, A. K. (2018). A mixed-integer programming approach for optimizing flow jamming attacks. *Computers and Operations Research*, 95, 83–96.
20. Bhuiyan, T. H., Moseley, M., Medal, H., Rashidi, E., & Grala, RK. (2019). A stochastic programming model with endogenous uncertainty for incentivizing fuel reduction treatment under uncertain landowner behavior. *European Journal of Operational Research*, 277(2), 699–718.
21. David Schweitzer, & Medal, H. (2019). Wireless LAN transmitter location under the threat of jamming attacks. *Computers and Operations Research*, 106, 14–27.
22. Hoskins, A., & Medal, H. (2019). Stochastic programming solution for placement of satellite ground stations. *Annals of Operations Research*, 1–22.
23. Huff, J. D., Medal, H., & Griendling, KA. (2019). A Model-Based systems engineering approach to critical infrastructure vulnerability assessment and decision analysis. *Systems Engineering*, 22(2), 114–133.
24. Huff, J, Leonard, WB, Smith, BK, Griendling, K, & Medal, H. (2019). NATO human view executable architectures for critical infrastructure analysis. *Engineering Management Journal*, 31(4), 224–245.
